Art Unit: 3751

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, drawn to a fastener, classified in class 24, subclass 455.
- II. Claims 9-15, drawn to a fastener and tub, classified in class 4, subclass 541.1.
- III. Claims 16-18, drawn to a combination tool, tub and fastener, classified in class 4, subclass 661.
- IV. Claims 20-24, drawn to a method of installing a fastener, classified in class 4, subclass 661.

The inventions are distinct, each from the other because:

Inventions III and I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the tub/fastener does not require the longitudinal slot and the tub/fastener/tool does not require the visible portion of the head of the tub/fastener subcombination. The subcombination has separate utility such as absent a tub or this specific tub.

Inventions IV and I-II are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown:

(1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as

Application/Control Number: 10/694,911

Art Unit: 3751

claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case the apparatus could be used for making a different product.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Upon the election of one of the above the following election species is required:

This application contains claims directed to the following patentably distinct species of the claimed invention: Fig. 3 and Fig. 4.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, at least claim 9 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably

distinct, applicant should submit evidence or identify such evidence now of record

showing the species to be obvious variants or clearly admit on the record that this is the

case. In either instance, if the examiner finds one of the inventions unpatentable over

the prior art, the evidence or admission may be used in a rejection under 35

U.S.C. 103(a) of the other invention.

A copy of CA 2,356,494 should be provided if consideration thereof is desired.

Any inquiry concerning this communication should be directed to Charles Phillips

at telephone number (571) 272-4893.
